## ABOUT ME

I'm a software engineer from México city with over +9 years of experience in the tech industry (since 2016), My area of expertise is in full stack web development, I have worked on a variety of projects, from small startups to large enterprises, I get the work done by analysing and improving (or creating from scratch) the codebase for a project, I'm eager to collaborate with different teams and create bigger projects, I'm fine doing work by myself, but It's better for me to reach higher goals by collaborating with different talents.
